Mai 82

Semiconducteurs discrets

Les prix figurant à ce tarif sont uniquement valables pour le marché français et s'entendent hors taxes (T.V.A. coefficient : 1,176).

Les composants sont expédiés emballés Franco pour les commandes d'un montant minimal de 900 francs hors taxes et de 150 francs hors taxes par ligne. Pour les montants inférieurs, il sera appliqué un complément de facturation de 150 francs par commande pour frais.

En toutes circonstances, qu'il s'agisse de technique ou de prix, THOMSON-CSF Division Semiconducteurs Discrets est à votre service :

à Paris Tél. : 788-50-01

pour la région Sud : (42) 02.91.08

Veillez adresser vos commandes aux adresses suivantes :

Paris : 50, rue Jean-Pierre Timbaud - B.P. 5/ 92403 Courbevoie

Sud : Chemin des Pennes au Pin - Plan de Campagne - 13170 Les Pennes Mirabeau.

Pour vos commandes de faible et moyenne importance, nous vous demandons de vous adresser aux distributeurs de la Division Semiconducteurs Discrets qui sont bien sûr à votre service pour résoudre tous vos problèmes dans ce domaine.

Direction Commerciale :

Commercial région Sud : Chemin des Pennes au Pin - Plan de Campagne -
13170 Les Pennes Mirabeau - Tél. : (42) 02.91.08 - Télex : 440076

Conditions de vente

SIGNIFICATION DES PRIX DU TARIF

Les prix figurant sur le présent tarif sont les prix unitaires hors taxes des articles sans recette. Tous frais de recette seront comptés en sus. Les prix sont valables uniquement pour les ventes sur le marché français métropolitain. Ils peuvent être modifiés sans préavis en fonction des données économiques et dans le respect de la législation en vigueur. Le coefficient à leur appliquer pour connaître le prix T.V.A. incluse est 1.176.

CONDITIONS GÉNÉRALES DE VENTE

Nos marchandises voyagent toujours, même en cas de livraison franco, aux risques et périls du destinataire. Quels que soient le lieu et le mode de livraison, nos factures sont toujours payables à Paris et nos traites ou l'acceptation de règlement sur une autre ville ne constituent ni novation ni dérogation à l'attribution de juridiction faite aux tribunaux de Paris.

RÉDACTION DES COMMANDES D'ARTICLES sous assurance de qualité CCQ, suivant normes françaises ou européennes.

Pour obtenir la livraison d'articles conformes à ces normes, ne jamais omettre d'inscrire sur votre commande la désignation complète de l'article suivie du signe CCQ ou CECC-F ou CECC-L.

Devis

Seuls les articles du catalogue condensé 1982 figurent au tarif. De nombreux autres articles : semiconducteurs sélectionnés pour applications spatiales, militaires et industrielles, puces pour montages hybrides, produits spéciaux, sont livrables sur demande.

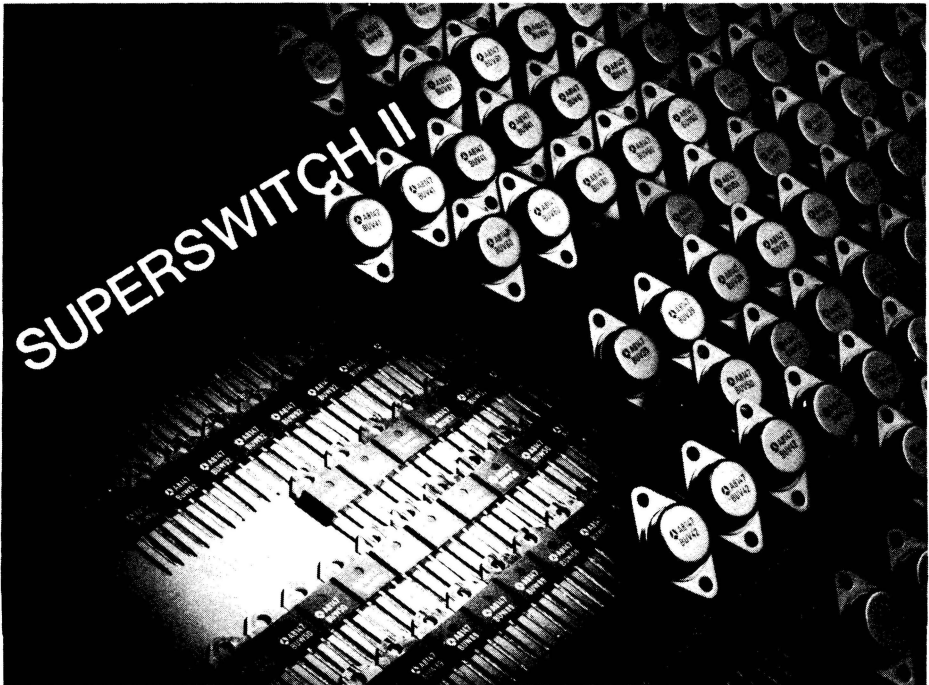

superswitch 2 :

une solution innovante pour les circuits d'aujourd'hui... et de demain

Une gamme très large $V_{CEO_{sus}}$ 90 V → 250 V
 $I_{C_{sat}}$ 4 → 50 A

Avantages pour l'utilisateur :

- Faibles pertes
- Moins de composants pour la commande et la protection
- Facilité d'utilisation
- Robustesse

thyristors asymétriques

Les thyristors asymétriques ont été spécialement conçus pour les applications dans lesquelles un thyristor est associé à une diode en anti-parallèle.

La structure de diffusion asymétrique à faibles pertes permet d'améliorer considérablement le compromis V_{DRM} - t_q .

THOMSON-CSF a développé 2 familles de thyristors asymétriques :

- Les TSD .35, TIA 028 et TA 329 avec une géométrie de gâchette interdigitée sont adaptés aux techniques d'extinction assistées par la gâchette. Ils ont été spécialement conçus pour fonctionner à des fréquences élevées (20 KHZ) à partir du réseau industriel redressé.
- La seconde famille avec les TA 449 et TA 925 est destinée à des applications traditionnelles d'onduleurs et de hâcheurs (commande de moteur, traction ferroviaire...). Pour les applications forte puissance, haute tension, ils permettent une amélioration sensible du t_q et des pertes par rapport aux composants symétriques.
